WORK EXPERIENCE

<i>Current</i> MAY 2017	Student IT Staff <i>University at Buffalo IT</i> Added to and edited the campus DNS, modified PHP code for LDAP search after a change in the LDAP server, wrote documentation, completed group requests, email and file restores.
May 2015 January 2017	Carry-out Cafe Employee <i>TOPS of East Aurora, NY</i> Worked with other team members to complete orders, serve costumers, and use the register.

PROJECTS

<i>beta</i>	SPIES spiesthegame.com Used Firebase, GitHub, Node, HTML and JavaScript to create this web app. Used Firebase's database service and learned about distributed systems to set up a complex database. Used principals of material design and JQuery to create an appealing web design. Learned about basic game logic and balancing. Coordinated with another developer to ensure code was well commented and readable. Administered a controlled beta test to find bugs. See benseibold.com for more information about the game.
<i>finished</i>	Personal Website benseibold.com Learned the basics of web development by creating a personal website with basic personal information and a list of ongoing projects
